Math I - Trigonometric Functions

1. Unit circle: sin(t) = y, cos(t) = x
2. tan(t) = sin(t) / cos(t)
3. sin^2(t) + cos^2(t) = 1

Math I - Trigonometric Functions

Graphs: period of sin, cos = 2*pi

Period of tan = pi

Amplitude: |a| in y = a*sin(bx)

Math I - Trigonometric Functions

Addition formulas

$\sin(a+b) = \sin a \cos b + \cos a \sin b$

$\cos(a+b) = \cos a \cos b - \sin a \sin b$
